

## The Continuous Need for Effective Prayer

One of the global recognitions in all of Christianity is our continuous need for fervent and effective prayer. We talk about it, we know we need it, yet most of us would admit that we find ourselves for various reasons not being as effective a pray-er as we would like to be. We know that through prayer God can change the world...yet we do not pray.

But what if you knew specifically how to pray, you knew when to pray, and you received feed-back on your prayers? Would that motivate you to join with millions of others in changing the world through prayer? Through Praelude's 20/20 Initiative you can join millions of other brothers and sisters across the USA and the world in praying for change and being a part of making it happen.

In the 20/20 Initiative you will select a 20 minute window and commit to pray within that time slot. You will be alerted electronically about 10 minutes before your selected prayer window through email, text message, FaceBook, twitter...you choose. You will be given 3 or 4 very specific prayer requests... you will join 503 others each week praying those same specific prayers...lifting them before the Father.

You will have a place on the web where you can go and see how God is specifically answering those prayers. You will be able to provide feed-back as to how perhaps you sensed God was speaking to you concerning these requests. You will be connected intimately to the ministry of the person whose prayer network you are a part of.

The second half of your 20/20 Initiative commitment will be to commit to invest \$20 a month to that ministry you are praying for. You will not only have the opportunity to shape how our Father is working around the world, but you will be able to actively participate in its resourcing and development.

That, is the Praelude 20/20 Initiative! You, changing the world, one prayer at a time; joining with those who have given their lives to boldly proclaim the Good News of Jesus Christ where you perhaps have not been able to go.
